VIZIO VA26L User Manual, VIP
Brochure and Registration Card

Remote Control
Includes 2 AA Batteries

Screen Cloth

The Best Connection:

For the best quality picture, we recommend using HDMI, DTV, RGB or Component inputs when possible. These are the only inputs capable of high definition (HD). Using these inputs does not guarantee high definition unless a high definition source is connected. However, not all equipment is capable of these connections. TV, AV and S-Video are not capable of HD signals.

+ Both DTV and TV share the same port. The television will automatically register which input type is connected.

Four Easy Steps: Simply follow our color-coded Step Charts and you're done.

1

Choose items to connect to your VA26L

- Determine which type of Signal Source and any Additional Equipment you wish to connect to your VA26L (Refer to reverse side for TV Source Setup).
- The colored dots under each Signal Source and Additional Equipment indicate which type of connections you may use to connect to your VA26L.

2

Choose equipment connection methods

- Using the colored dots from Step One, follow the row across to Step Two to match up the colored dots to the same colored connection method.
- Chose **ONLY** one method for each piece of equipment.

3

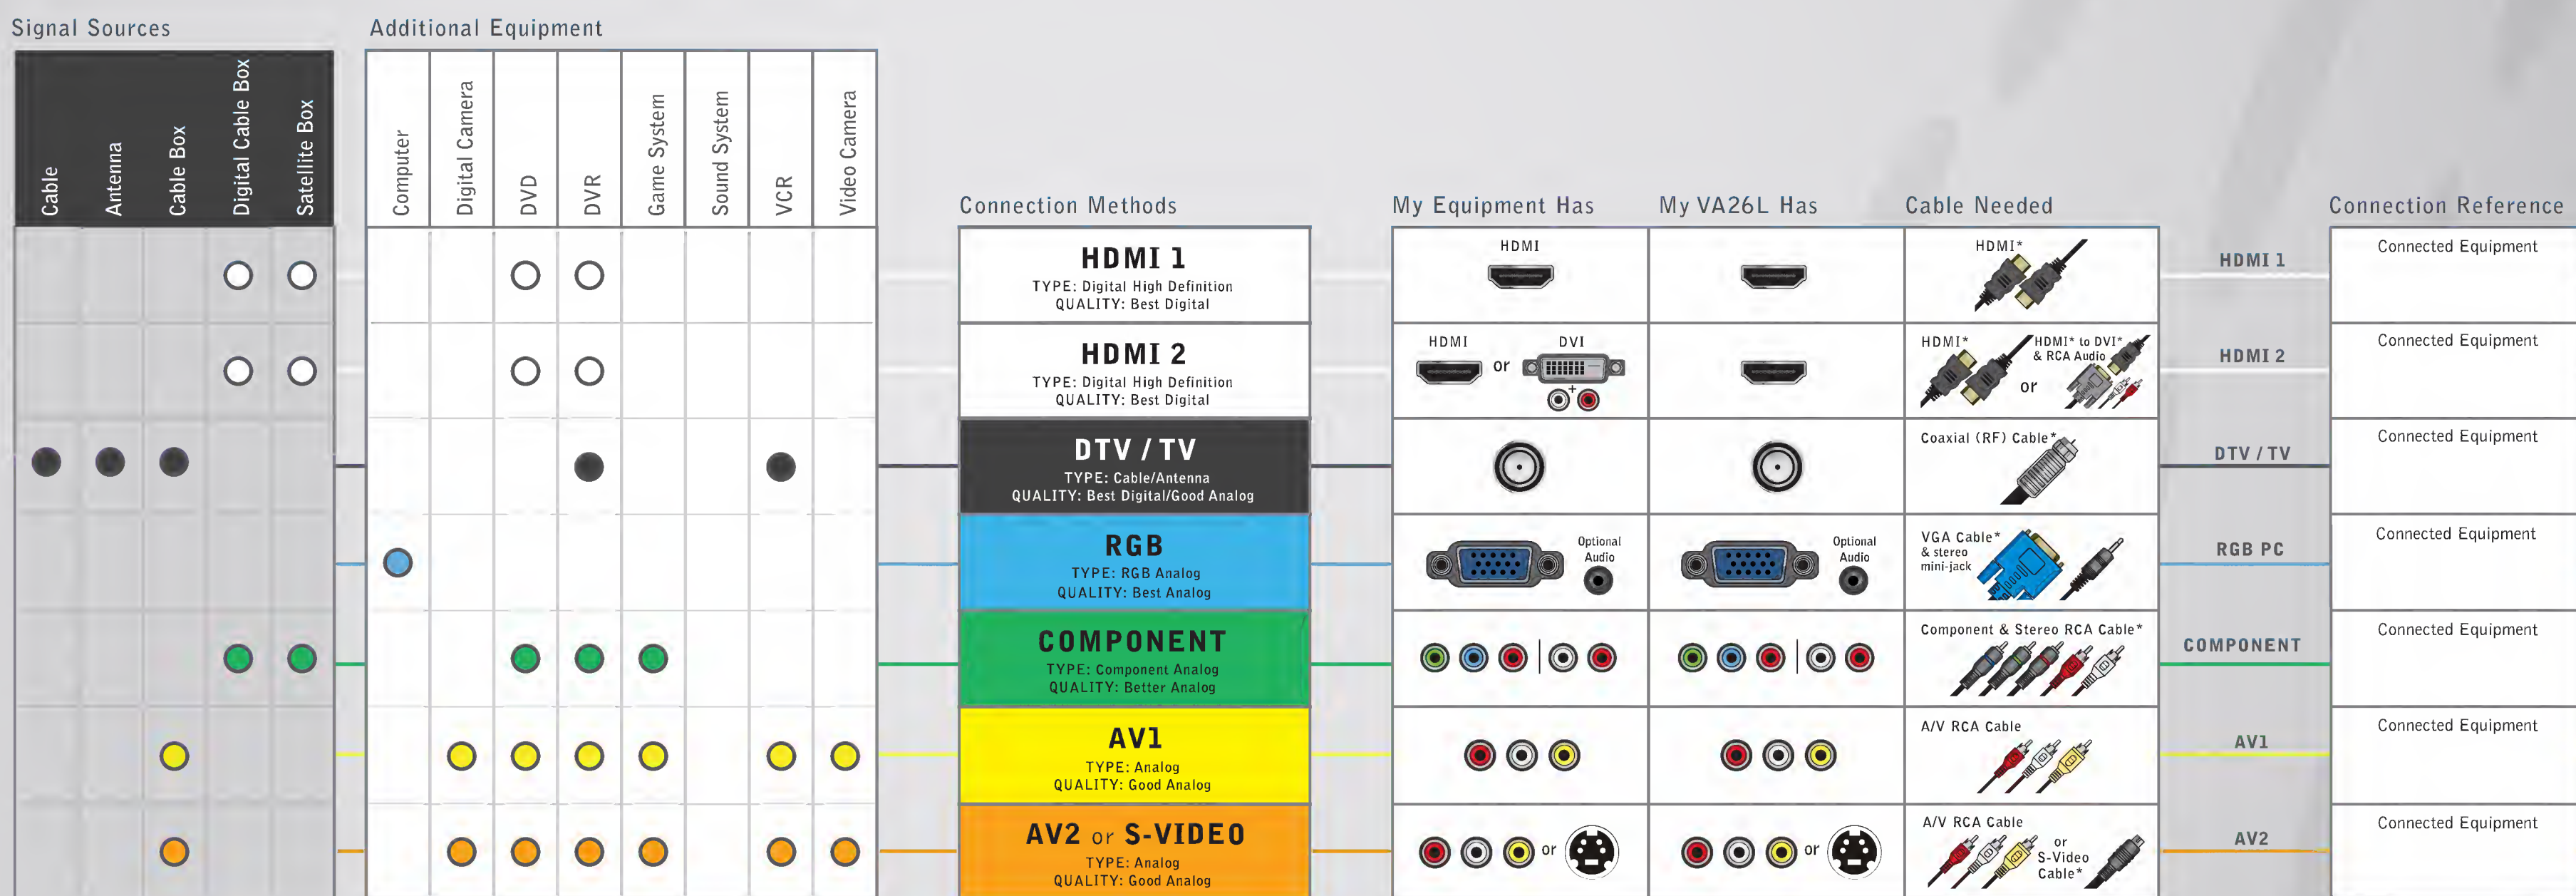

Select cables and make connections

- Once you have determined the connection methods from Step Two, follow the row to Step Three to determine what kind of cables you need and what the connections look like on your equipment.
- Following the color-coded system, use the appropriate cables and connect your Signal Source and Additional Equipment to the color-coded inputs on your VA26L (Refer to Connection Map at bottom of page.)
- Once connected, turn on your VA26L and all your equipment.

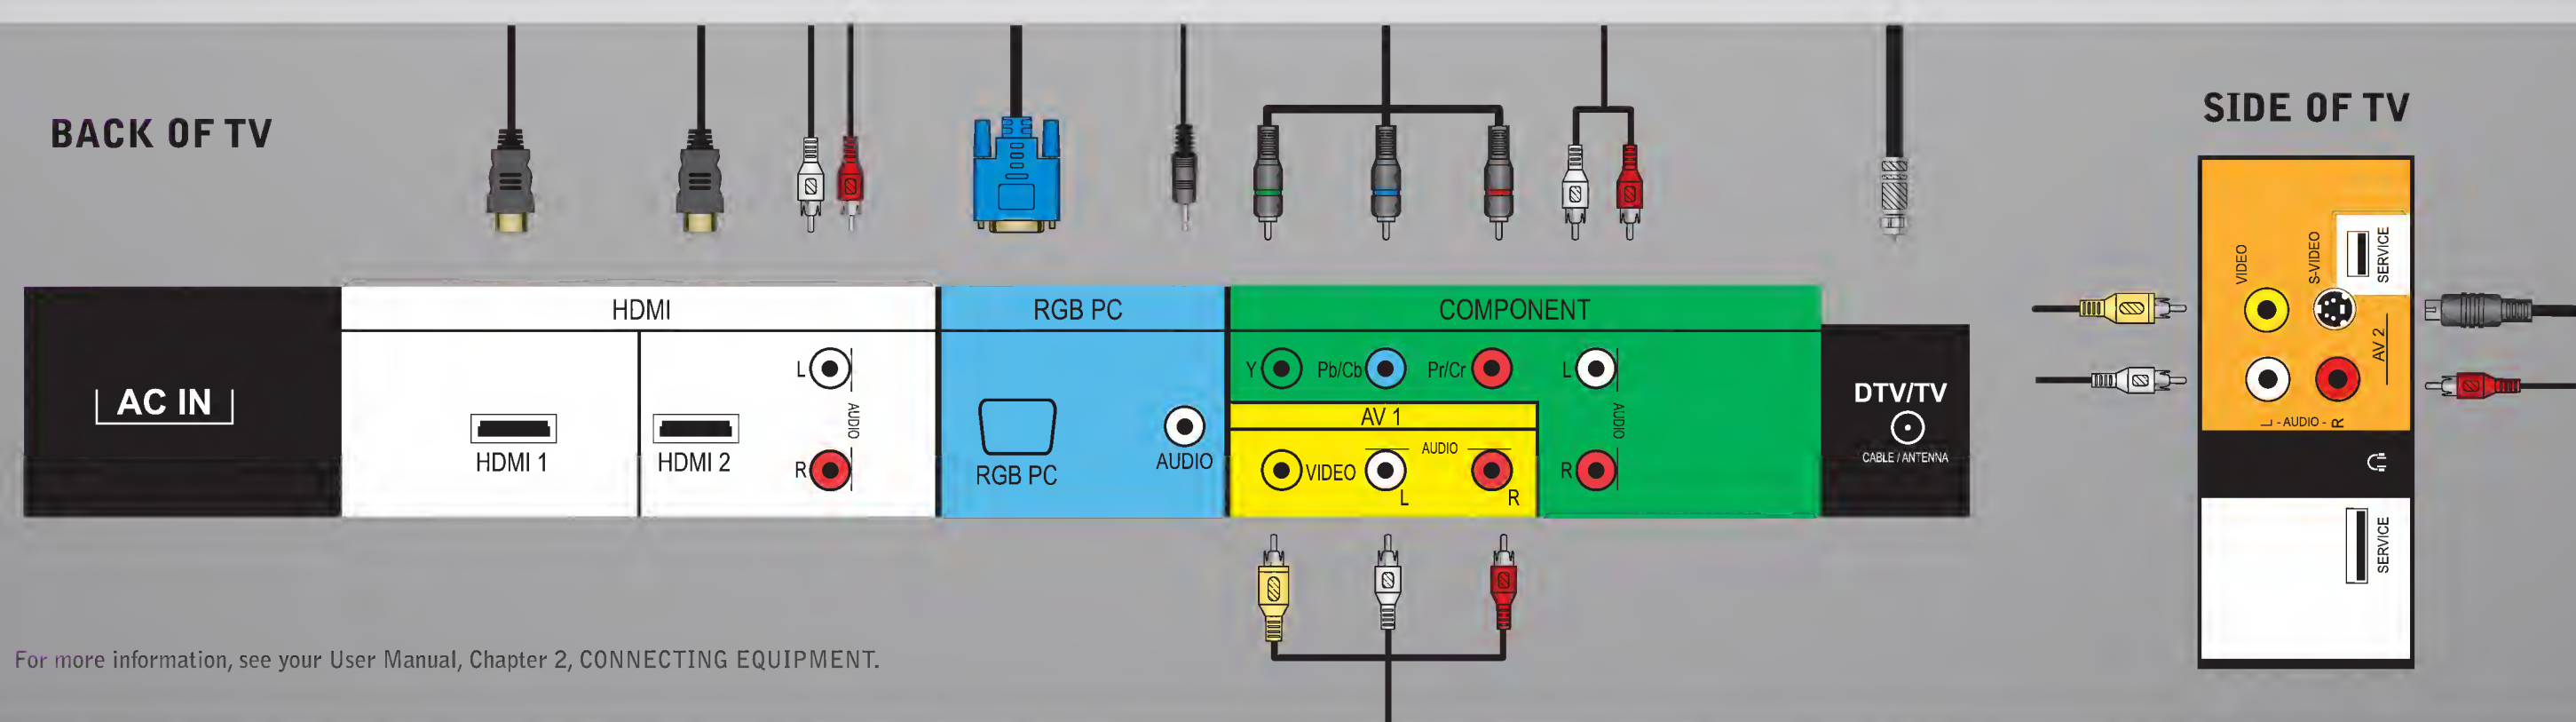

4

Begin using your VA26L

- Fill in the Connection Reference Chart below, noting how you will connect your equipment/signal source to your VA26L.
- Press the INPUT button on your remote. The Input Menu will display on-screen
- Continue pressing the INPUT button until you reach the corresponding connection.

To Use This Chart: Write your equipment or signal source into the squares corresponding to your connection method. HDMI Cable, DVI-HDMI cable, AV cable, VGA cable, Audio mini-jack and Component Cable are not included. These cables are available at www.VIZIO.com (View back for more details).

For more information, see your User Manual, Chapter 2, CONNECTING EQUIPMENT.

3 WAYS TO GET HDTV

- 1 Off-Air antenna** (using the DTV antenna input)
To see if you are able to receive HD signals off-air and for help choosing the right antenna, visit www.antennaweb.org.
- 2 Cable** Subscribe to HD programming through your local cable company (HD cable box required).
- 3 Satellite** Subscribe to HD programming through DirecTV or Dish Network (HD satellite receiver required).

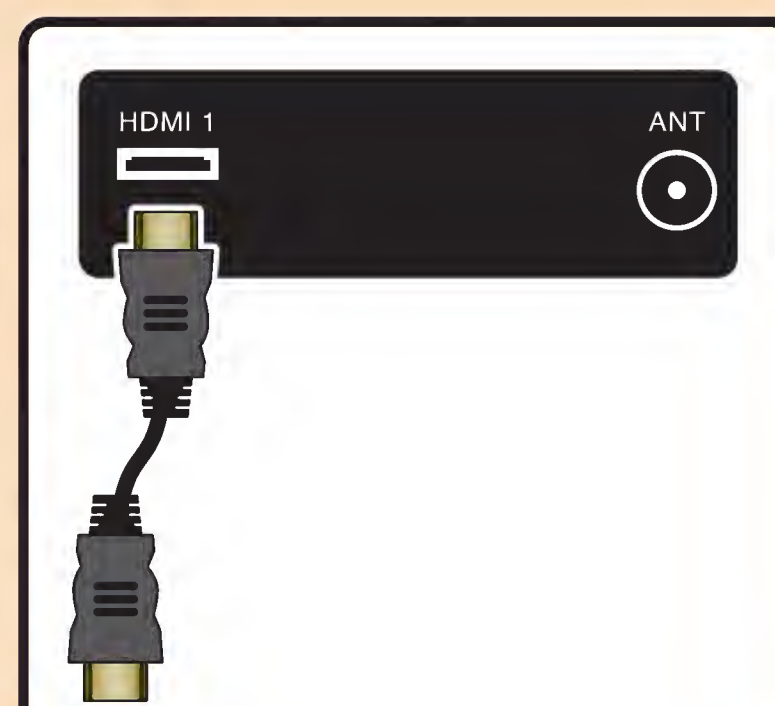

VIZIO provides wall mounts & Installation Services.
Call (888) 849-4623 or visit us online for more information.

Connect your TV: Choose **1** of the following three options to connect your TV to your Satellite/Cable Box.

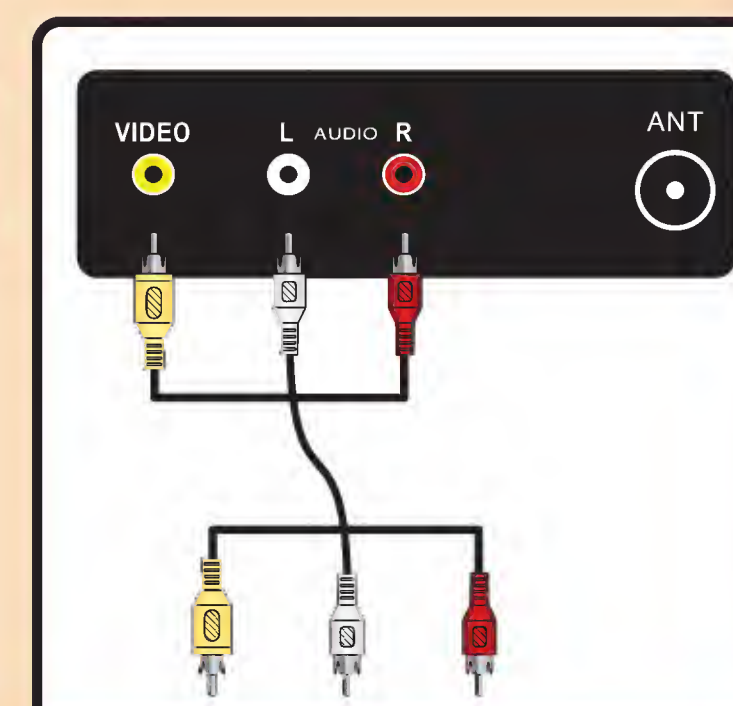

If your satellite or cable box has:

OR

OR

Connect to your TV using:

**Digital HDTV
HDMI**

OR

**Analog HDTV
Component**

OR

**NON-HDTV
AV Component**

Optional Components

Enhance your VIZIO Experience.

When it comes to components and accessories, don't settle for less than VIZIO. We offer a full line of products specifically designed to accentuate your VA26L. To learn more about how you can enhance your VIZIO experience, call 888-849-4623 or visit www.VIZIO.com.

VIZIO High-Definition Certified Cables

Our VIZIO Certified HD cables carry the same standards of excellence as all our VIZIO products.

Available in: DVI, HDMI and Component in lengths of 2, 5, and 10 meters.

VIZIO Certified Mounts

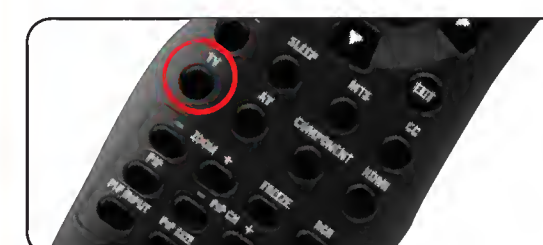

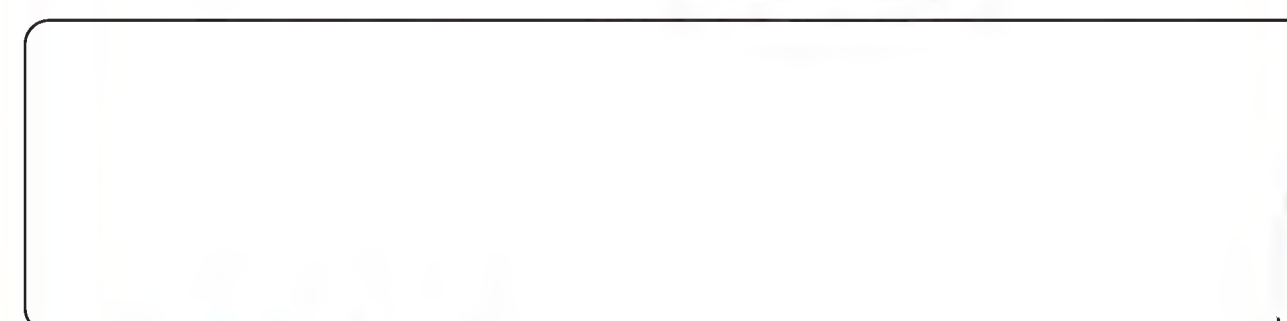

Program your TV:

Programming your VA26L is a simple **TWO STEP** process. All you need is your Remote Control.

1

Connect your Signal Source to the **DTV/TV** connection.

Please Note:

- Be sure the batteries in your remote are inserted correctly.

For advanced setups, refer to chapter 3 of your VA26L User Manual.

Program your Cable/Satellite Box Remote

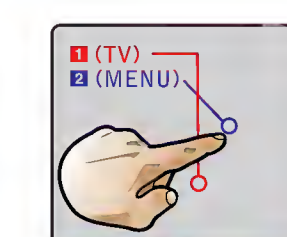

Consult your Cable or Satellite Owner's Manual to determine if you need a 3-, 4-, or 5-digit code.

If your Cable or Satellite Box requires:

- 3-digits, please use "627" (This code usually works with DISHNetwork)
- 4-digits, please use "1758" or "0178"
- 5-digits, please use "11758" or "10178" (These codes usually work for DIRECTV)

2

TV Tuner Setup

On your Remote Control...

- 1 Turn on the TV, the Initial Setup screen should appear. If this screen does not appear see User Manual Chapter 3 for TV Tuner Setup.
- 2 Select Language; English, Français, Español.
- 3 Press **▲** or **▼** once to select Cable or Antenna. Select Cable if you are using cable from the wall or Air if you are using an antenna.
- 4 Press **▶** to continue to the next screen.
- 5 Press **OK** on remote to scan for channels. Scanning for available channels could take several minutes.
- 6 Once scanning is finished, programming is complete.
- 7 For more detailed information see Chapter 3 of your User Manual.
